

Update on statewide enforcement of UDC

by Laurence J. Swaziek,, S&B UDC Program Manager, 608-267-7701, lswaziek@commerce.state.wi.us

A new Wisconsin law requires the state's Uniform Dwelling Code be enforced in all municipalities. This includes the necessity to have new construction inspected for compliance with the UDC, the statewide building code for one- and two-family dwellings built since June 1, 1980.

The change was effective December 18, 2003. However, it will take three to six months to get the enforcement system into place.

Previous to the new legislation, municipalities with a population of 2500 or less could choose by

Where required, S&B plans to begin contracted enforcement for new homes by September 1, 2004.

resolution to decline UDC enforcement. Municipalities of over 2500 have been required to enforce the UDC.

Now the smaller municipalities will also come under the UDC system to assure the proper construction of one- and two-family residences.

Those municipalities which previously chose to not enforce the UDC now have three options:

1. Adopt an ordinance to begin local enforcement of the UDC. This may include contracting with another municipality or a private party to do the work;
2. Delegate enforcement to their county, if the

System area for a POWTS can be extended beyond borings

by Duane Steiner, Wastewater Specialist, 608-235-0608, dsteiner@commerce.state.wi.us

Can someone go beyond the soil borings with their Private Onsite Wastewater Treatment System design and installation? Yes.

The POWTS Code, Comm 83, states that three borings, at a minimum, are utilized to define system area. Based on the soil borings, contours, slopes, soil profile similarities and/or dissimilarities, the Certified Soil Tester establishes a suitable area, which must be identified on the soil report.

By drawing a line around this suitable area on the site report, the CST indicates where a dispersal cell may be located. If the CST feels comfortable

POWTS code changed Feb. 1

by Roman Kaminski, POWTS Program Manager, 715-345-5334, rkaminski@commerce.state.wi.us

After a multi-year effort, the first comprehensive revision in 20 years to Comm 83, Private Onsite Wastewater treatment Systems Code, was implemented July 1, 2000.

Once the industry began to actually use the code, a number of "issues" were brought to the attention of the Safety and Buildings Division staff, including inconsistencies in code language, requests for clarifications, and requests to address topics not covered in the code.

A code council representing interests of parties from the private and public sectors was formed

UDC enforcement

continued from page 1

county is willing to accept it. Currently three counties have UDC enforcement programs: Adams, Chippewa, and Eau Claire; or

3. Take no action - which then causes the Safety and Buildings Division to enforce the UDC for new homes in the municipality.

The Safety and Buildings Division has asked municipalities to notify us of their enforcement choice. The current enforcement status of record for municipalities in Wisconsin is on the S&B WebSite, <http://www.commerce.state.wi.us/SB/SB-UDCProgram.html>.

With any of the options, it is necessary to purchase and assign UDC permit seals for all new homes and to use UDC-certified inspectors or registered UDC Inspection Agencies for all inspections. There are

several categories of UDC inspection certification including construction, electrical, plumbing and HVAC. A person or combination of persons certified in all categories must perform the inspections.

Where required, the Safety and Buildings Division plans to delegate or contract out UDC enforcement.

Where S&B is required to enforce the UDC, because of the local government choosing that option, the division may delegate the authority to the county, if the county accepts the responsibility. Otherwise, S&B will contract for UDC enforcement with registered UDC Inspection Agencies who will be providing inspection services for specified areas of the state. The inspection agency will collect fees from the permit applicant to cover the cost

of agency services. S&B plans to begin contracted enforcement for new homes by September 1, 2004.

to 3:30 p.m. **Includes Lunch.**

**6 hours credit to POWTS Insp,
MP, MPRS, JP, JPRS, CST,
POWTS Maint**

County may provide enforcement

A county may provide county-wide enforcement in those municipalities that elect to delegate authority to the county or that enter into a contract with the county to provide joint enforcement. As mentioned previously, where S&B is required to enforce the UDC, we may delegate our responsibility to the county. If the county now enforces UDC erosion control only, and the municipality now decides itself to enforce the full UDC, then the municipality has enforcement authority over the UDC erosion control requirements as well.

Inspectors will look at plans and for cards

All dwelling construction in the state requires a Wisconsin Uniform Building Permit from the municipality or the authorized inspection agency. If the permit applicant is a contractor,

UDC enforcement

continued from page 3

they need a Dwelling Contractor Financial Responsibility Certification (DCFRC) from S&B prior to being issued a permit. Permit applicants must provide dwelling plans for review and approval, and must call for inspections at the times listed in the UDC.

Owner is currently responsible

If a dwelling is constructed in a municipality that does not currently have an enforcement program, the owner is responsible for obtaining a building permit and inspection services from a inspection agency of their choice. A list of inspection agencies may be found at the S&B WebSite, <http://www.commerce.state.wi.us/SB/SB-CredList.html>.

Builders will need to be aware

As of December 18, 2003, all one- and two-family dwelling construction in Wisconsin requires a Wisconsin Uniform Building Permit from the municipality or the appropriate UDC Inspection Agency, depending on who enforces the code.

The building permit applicant, who may be a builder or owner, will be charged inspection fees prior to receiving the permit. If a dwelling contractor is the permit applicant, the person issuing the permit is required to check for a DCFRC card.

The requirements to submit dwelling plans for review and approval, and to call for inspections at the times listed in the UDC, remain unchanged.

An email group has been set up for people who wish to receive occasional email notices of important information concerning the Uniform Dwelling Code. See <http://www.commerce.state.wi.us/SB/SB-DivEmailSignup.html>.

Plumbers, here's good news!

Because some folks need a reminder from time to time that plumbers must be licensed in Wisconsin, the following paragraph has been added to all Safety and Buildings Division plumbing and POWTS plan approval letters: "No person may engage in plumbing in the state unless licensed to do so by the Department per s.145.06, stats."

And, on another topic, changes in the Uniform Dwelling Code law, as noted in the article on the left improve the process for making sure licensed plumbers' names and credential numbers are recorded when people apply for building permits for one- and two-family dwellings in Wisconsin. The UDC, including mandated construction inspections, will now be enforced in all of our state.

Don't neglect boilers just because they operate automatically

Just before Christmas 2003, an earth-shaking boiler incident was reported in Reedsburg. The preliminary investigation revealed extensive property damage, personal injuries and, fortunately, no fatalities.

Safety and Buildings Division staff want to provide boiler owners and operators some important inspection requirements, maintenance tips, and quick and easy references to help prevent future accidents in Wisconsin. A document titled, "Don't neglect boilers!," is available on the S&B WebSite in several formats, <http://www.commerce.state.wi.us/SB/SB-BoilerAndPressureVesselProgram.html>. The National Board of Boiler and Pressure Vessel Inspectors provided the background information.

The National Board's violation tracking statistics for the third Quarter 2003 indicate that

the majority of violations reported were in the boiler controls, components, and piping areas. Since these statistics identify problem areas and trends related to boiler and pressure vessel operation, installation, maintenance, and repair, owner/operators can and should use such statistics to plan maintenance that may eliminate these unwanted trends. Proper inspection and regular routine maintenance are necessary to assure uninterrupted, reliable and safe boiler operation.

Delivery of a boiler is followed by inspection and maintenance

Suitable POWTS area

continued from page 1

extending the suitable area to some extent beyond the borings, based on slopes, contours, and soil data obtained from their site visit, that is a decision they can make and be responsible for, with several cautionary points to be noted.

The CST takes responsibility for determination of the suitability of the additional area, and the local permit issuing authority or state staff must concur.

Extension of system designs and installations beyond the original designated suitable areas of a soil test may only occur when there are additional soil borings beyond the minimum.

The local authority and Safety and Buildings Division staff retain the ability to request soil and site verifications, including even more borings, to insure site suitability.

Any questions regarding this matter can be directed to one of the Wastewater Specialists or POWTS Plan Reviewers listed on page 10 of this *WCCR*.

POWTS code changed Feb. 1

continued from page 1

to advise and to recommend solutions that could be included in a code "fix-up" package. That package went through public hearing and review by legislative committees, and was adopted by the Department of Commerce Secretary, Cory Nettles. The changes went into effect February 1, 2004.

The following summarizes some of the more significant items in the rule change package. For a longer summation, see the POWTS Program online, <http://www.commerce.state.wi.us/SB/SB-PowtsProgram.html>, or a paper copy is available from Todd Taylor, S&B Communications, ttaylor@commerce.state.wi.us, 608-267-3606.

Comm 2 Fee Schedule: The revision clarifies how fees are calculated for larger systems and sets registration fees for state-owned privies.

Comm 81 Definitions and Standards: The revision provides two clarifying definitions: "Accessory building" was added to streamline the plan review process at the local level. "Open bodies of water" was added to clarify language relative to

Policy change for Interpretive Determination onsite consultations

by Matthew A Janzen, Wastewater Specialist, 715-345-5336, mjanzen@commerce.state.wi.us

The Safety and Buildings Division has instituted a new policy regarding onsite consultations by S&B Wastewater Specialists for Interpretive Determinations. The change may affect Certified Soil Testers who file reports under Comm 85.60(2).

Wastewater Specialists will no longer perform onsite consultations prior to receipt of a complete Interpretive Determination report. A complete report includes the application, fees, soil test, and

narrative as required under Comm 85.60(2)(c).

Wastewater Specialists will still be available for in-office consultation prior to submittal. Field inspections/verifications prior to final approval may be conducted at the specialist's discretion.

If you have any questions regarding this policy, contact Matt Janzen, or your district Wastewater Specialist, listed on page 10 of this *WCCR*, or online, <http://www.commerce.state.wi.us/SB/SB-PowtsWastewaterSpecialistsMap.html>.

continued from previous page

discharge of wastewater into surface waters.

Comm 82 Design, Construction, Installation, Supervision and Inspection of Plumbing: Manhole opening dimensions for a grease interceptor were revised to be consistent with POWTS treatment and holding tanks. (There were other minor changes to Comm 82 and 84.)

Comm 83 Private Onsite Wastewater Treatment Systems: -Clarification that the code is a statewide uniform code. Exceptions such as ability to ban or limit certain technologies [Comm 83.32(2)] continue.

-Clarification that municipalities generally cannot enact plumbing ordinances that are more or less restrictive than this chapter.

-Allows POWTS installers to receive "just in time training" for new treatment components.

-Allows counties to review certain POWTS designs, as listed in Table 83.22-3, that are intended to serve not more than two one- or two-family dwellings and their accessory buildings.

-Modification of language that addresses large system plan review to clarify that DNR concurrence is required and how the designation of a large system is determined.

-Clarification that existing, non-pressurized components can be rehabilitated using higher quality effluent without using pressure distribution.

-Table 83.44-2 is revised to provide more soil-related information and adjustments to soil application rates for effluent.

-Table 83.44-3 is revised to reflect additional treatment information and requirements for coarse sandy soils.

-Horizontal and vertical distance information for the purpose of servicing of tanks has been added for inclusion in management plans. This was requested by pumpers that service tanks. It serves as an alert to POWTS designers of the capability limits of normal pumping equipment.

-Clarification that inspection, maintenance and servicing must be reported to governmental units.

-Modification of the time period for filing of reports from 10 business days to 30 calendar days.

-Clarification that the governmental units must maintain records related to inspection, maintenance, and servicing events.

Comm 84 Plumbing Products: -Clarification relative to minimum size access openings and their locations. This code language is the result of lengthy deliberations and reflects consensus between organizations representing installers, pumpers and pre-cast concrete tank manufacturers. Note: Tank manufacturers will be permitted to use up existing tank inventory for any state Sanitary Permits that are issued prior to August 01, 2004.

Comm 85 Soil and Site Evaluations: - Clarification of how abrupt soil texture changes are to be handled. Adds technical descriptive language for specific soil conditions that was not included in the current code, but had been listed in the previous code.

UDC Electrical Systems Seminars One- and Two-Family Dwellings

Presented by the Wisconsin Chapter,
International Association of Electrical Inspectors

This is a unique offer of training on the electrical wiring requirements of Comm 16, Wisconsin's Electrical Code, and the National Electrical Code, as they pertain to one- and two-family dwellings. Comm 16 and 2002 NEC have many changes concerning these dwellings, including changes to 2002 NEC that make it easier to use. Instructors: Michael Johnson, IAEI Director of Education, member NEC CMP5, member UL Electrical Council, and Joe Hertel, Monty Ewing, Tom Garvey, Ray Weber.

February 6, Friday -Wausau -Park Inn, 2101 N Mountain Rd
February 14, Saturday -Eau Claire -Ramada Inn, 205 N Barstow St
February 21, Saturday -Janesville -Holiday Inn Express, 3100
Wellington Pl

Fee: \$80 per session, or (optional) \$170 includes IAEI membership, association magazine, and special IAEI offers. \$40 late registration fee due after seven days before session. Eight hours continuing education from both IAEI and the Safety and Buildings Division. Registration/ check-in 7 to 8 a.m., seminar 8 a.m. to 5 p.m., includes continental breakfast, breaks, lunch.

Mail check to Wisconsin Chapter IAEI, 114 Charleen Lane, Madison, WI 53714-2612. Mark you calendar. No confirmations will be sent.

Enrolled Commercial Building Code is updated

An up-to-date 2003 Enrolled *WCBC* is now available in a two-volume, ring-binder paper set, for \$200, and in a single-user, compact-disc electronic version for \$240.

There have been two *WCBC* revision packages since the Enrolled Code was originally printed in 2002, with one being effective last spring.

There are now two update sets of pages for the original paper 2002 version of the Enrolled Code, available for free download or for purchase (\$10 per set), <http://www.commerce.state.wi.us/SB/SB-CommercialBuildingsCodeObtain.html>.

The paper copies of the complete Enrolled Code, as of November 21, 2003, are complete new versions which do not need any update pages. (All CD copies of the Enrolled Code, no matter when purchased, are the latest versions and do not need any updating!)

As of November 21, 2003, the second paper printing of the Enrolled Code became available. The second paper printing differs from the original 2002

The ***Wisconsin Enrolled Commercial Building Code*** includes Comm 61 to 65 and adopted provisions of the International Code Council codes.

printing by incorporating code changes that became effective on July 1, 2002, and on May 1, 2003.

Replacement Pages: Any paper copies of the 2002 printing that were purchased before July 8, 2002, can be updated to match the latest, printing by obtaining a 2002 set of replacement pages and a 2003 set of replacement pages. Any paper copies of the 2002 printing that were received after July 8, 2002 and before November 21, 2003, (which did include the 2002 set of replacement pages) can be updated to match the latest printing by obtaining just the 2003 set of replacement pages. These two sets of replacement pages can be downloaded free on the S&B WebSite, or can be purchased using the order form below.

Order Form - *Wisconsin Enrolled Commercial Building Code* - February 2004
